Introduction
The Floor Plan User Manual contains all the information you need to begin using the Floor Plan app.

Operating your HoloLens

Wearing your HoloLens
Refer to the official HoloLens manual published by Microsoft.

Turning on your HoloLens
Refer to the official HoloLens manual published by Microsoft.

Launching the Floor Plan app
Follow the steps listed in the official HoloLens manual from Microsoft to launch an app.

Navigating the Floor Plan app
Floor Plan consists of a set of nested menus to select by category, then filtering options to select by size, style, and color.

Choosing furniture
Navigate through the menus, pointing with one finger at a menu item for a set amount of time (2 seconds by default) to navigate into a submenu, if one exists. If a submenu doesn’t exist, color options will appear for the furniture item you have selected.
Manipulating furniture

Placing furniture

Option 1: Placing a piece of furniture in the room.
Select an item from the menu and swipe with one finger from the menu item out into the room. If you do this with a category selected, the first furniture item in that category will appear.

Option 2: You have already placed a piece of furniture in the room.
Swipe your hand sideways across the furniture to replace it with the next item in the list. Swiping left to right will show the previous item in the category, while swiping right to left will show the next item in the category. If you have reached the end of a furniture category, the list will wrap back to the start of that category.

Removing furniture
Place your hands on either side of the piece of furniture and bring them together, as if you were squishing the furniture. Once your hands meet, the furniture item will disappear.

Moving furniture
Hold up your hands on each side of the piece of furniture, and close your fists as if you were grabbing the piece of furniture. Move your hands around to move the furniture for as long as your fists are closed.

Rotating furniture
Hold up both hands and move them as if you were holding a sphere. You are able to rotate your furniture on 3 axes; however, the furniture will snap back to the floor if not level when released.
Releasing furniture
At any time you wish to stop interacting with a piece of furniture, close your hands into fists and move them away from the piece of furniture.

Purchasing furniture

Choosing your vendor options
Navigate to the purchasing settings to turn on an option that allows HoloLens to use your location to suggest vendors you can purchase from. Alternatively, you can manually search for vendors using your zip code.

Purchasing items
When you have decided on a piece of furniture, select it in the menu or the world by pointing to it for the configured amount of time (2 seconds by default). This opens a menu where you can view price options and select the vendor you want to purchase from. At this point you will be redirected to the vendor’s website to complete your purchase and select delivery options.

Privacy Information
Floor Plan does not store any of your personal data. Location based settings are only stored locally on your HoloLens, and all purchasing is handled separately by your selected vendor. You have the option, and are encouraged, to back up your Floor Plan configurations on your OneDrive, which requires a separate account with Microsoft.

Troubleshooting and Help

Floor Plan doesn’t start, or crashes on startup
Try following the steps in the official HoloLens manual from Microsoft to restart your HoloLens. If this doesn’t work, try reinstalling the Floor Plan app. If this does not solve your problem, contact us using the information provided below.
