YES CHEF USER MANUAL

1 INTRODUCTION

This user manual outlines the uses and functionality of the Yes Chef application. It also includes step-by-step instructions for various use cases, including how to use it as a chef and as a consumer.

1.1 Purpose and Scope

The purpose of this manual is to provide users with information and detailed instructions necessary to use the Yes Chef application. The manual includes how to set up a user profile (for chefs and consumers), check ingredient listings, get meal recommendations, use the map feature for meal availability, and review your meal.

1.3 Points of Contact

Yes Chef's customer support center is open 24/7 for all questions or concerns about our product. To reach us, simply call (907)123-4567. Alternatively, you can get in touch with us at Support@YesChef.com or mail us at 1234 Random Lane, Fairbanks Ak, 99775. Feel free to visit our website at https://projects.cs.uaf.edu/redmine/projects/cs371_f18_yes_chef/wiki for further information on Yes Chef.

1.4 Project References

Check out our website for more information: https://projects.cs.uaf.edu/redmine/projects/cs371_f18_yes_chef/wiki

1.5 Primary Business Functions

The primary function of the Yes Chef application is to provide a platform to connect chefs to customers. Chefs have the ability to create profiles of meals and share their location. Customers are able to search and request meals, share their dining experience, and rate their experience.

1.6 Glossary

Chef: A user which cooks meals and/or makes sales.

Consumer: A user who orders and/or requests meals.

2 SYSTEM CAPABILITIES

There are two distinct sides of the application system. The Consumer Side and the Chef Side.

Consumer Side
- meal search
- meal info
- map and list options
- ordering
- rating
- profile and social media

Chef Side
- meal availability
- meal creation
- rating
- profile and social media
- delivery

2.1 Purpose

The inception of Yes Chef stemmed from the recognition that food is an integral piece of culture. It's a way of sharing traditions and values. Our team was disappointed American food culture's cheap, unhealthy, and often isolated nature so Yes Chef was built to change that. Yes Chef provides an alternative dining experience which is fast, healthy, authentic, and social.

2.2 General Description

Yes Chef is an application which connects local chefs to consumers. The Yes Chef app provides a platform for chefs to create and share meals and for consumers to experience authentic home cooked food as well as request meals. The Yes Chef app additionally allows for the seamless integration of payment, reviews, and social media sharing of the experience.

3 DESCRIPTION OF SYSTEM FUNCTIONS

The Yes Chef functions are all accessible from the main screen of the app, designed to be most easily accessed and learned by new users, focusing on functions that are similar to other apps that users will likely be familiar with.

3.1 Creating a Yes Chef account

Full use of the Yes Chef app requires the creation of a user account. The following section describes how to create a new account. If you already have an account, you can skip to section 3.2.

After downloading and opening up the app for the first time, the home screen will take you to a page where you will be given the option to either "Create a New Account" or "Log in."
Click on create new account. A new window should pop up asking for certain information, including the user’s email account. After the information has been entered and the email account has been verified, the click on “Create Account” to finalize the account creation process. You have just created your new Account and can log in normally.

3.2 Log In

Once your account has been created, you will have the option to log in. If you still need to create an account, go back to 3.1 for instructions on creating a new account. At this point, you should have the option of logging in with the “Login” button on the same page as the “Create New Account” button. Click on “Login” and type in the information for the account that you created previously.

If you do not remember this information, there will also be an option to reset this information through email. If the information recovery option is selected, the app will ask for your email and will then send you a link that will let you reset your password. After creating a new password, return to the app to enter this new information. If you forgot your newly created password, you can return to the password recovery option from here as well.

3.3 Searching for a Meal

Once you log in, you can search for a meal or a chef and view the results as a list of on the map to see which locations are nearest you.
3.4  **Get Meal Suggestions**

Not sure what you want to eat? Let Yes Chef create custom recommendations that fit your tastes.

- Click on “Suggest a Meal”
- The app make recommendations based on your indicated preferences, meal history, and what’s locally available.
- Choose one of the options or search again if you don’t see anything you like.

3.5  **Check Ingredient List**

Every meal has an ingredient list to see what’s in your meal. Have allergies or or specific dietary needs that don’t quite match up but still want the meal? Let your chef know and they may be able to customize it to fit your needs.
3.6 View Your Rewards

After 5 meals you get a free meal. On your sixth meal, simply follow these steps to redeem:

Open App
- Order Meal

At checkout
- "Would you like to use your free meal?"

Sit Back, Relax
- Enjoy!

You can view your meal redemption history and see how many meals you have left to go before your next free one.
Need some inspiration or just want to check out what meals your friends are enjoying?

View the Live Feed to see what delicious meals are being served near you. Want to share your meal?

- Hit “Post” on the Live Feed page
- Add a picture
- Leave comments on what you’ve been enjoying
- Click “Publish” to post it on the feed.
3.8 Rate Your Meal

What did you think? Was it delicious? Was it sub-par? Let the chef and other users know what you thought about your meal.

On your “Meal History” page:
- Click the meal you’d like to review
- Leave your review
- Rate it out of a 5-star point system (5 is the best)
- Click “Done”

4 OPERATING INSTRUCTIONS

4.1 Initiate Operation

Yes Chef can be downloaded from the Apple app store or the Google Play store. Upon successful installation of the app onto a smartphone, opening the app will bring the user to the page where they can log in or create an account.

4.2 Maintain Operation

Updates to the app will be released fairly frequently whenever bugs are fixed or new features are added. When a new update is released, the update can be downloaded from whichever app store the app was originally downloaded from.
4.3 Terminate and Restart Operations

To intentionally close the application, do the same procedure you would do to close any other app on whatever device you are using. In order to restart the app after an unexpected crash, simply reopen the app from wherever it is installed on the device’s home screen.

5 ERROR HANDLING

5.1 Error Codes

Error 001: A message was not sent properly. Try checking your internet connection and resending the message.

Error 002: Payment not sent or received. Try checking your internet connection, following the payment client’s (paypal, for example) troubleshooting guide, or calling Yes Chef customer support for more help.

Error 003: Review posted in the wrong section. Post the review of the chef in the review section, not in the social media section.

5.2 HELP FACILITIES

For additional help or information, please our website at www.YesChef.com, or email our support at support@YesChef.com. Our support can also be accessed by calling us at (907)-123-4567.
